

## AUTOFLOW-2

### AUTOMATIC SAWING & MACHINING CENTRE

#### THE ADVANTAGES

- > Fully automatic uPVC window and door fabrication machine
- > Quick and accurate sawing and prepping of full bar lengths into finished pieces, ready for welding and cleaning
- > Automatic loading, prepping, cutting and discharge
- > Rotary tooling mechanism ensures accuracy, speed and flexibility as well as reliability
- > Multiple profile suits if required
- > Five high speed spindles and the 'Y'-drive sawing module for perfect 'Y'- notches
- > Around 350 to 400 windows in a forty hour shift
- > Slim 2.3m width at the maximum point
- > Running on Windows 10 software, utilising latest control systems manufactured by Beckhoff

High **productivity**

Intuitively operated  
information management  
system

Volume oriented  
yet **compact**
