

BUFFER AND ASSEMBLY SYSTEMS

ASSEMBLY / COMPONENT HANDLING

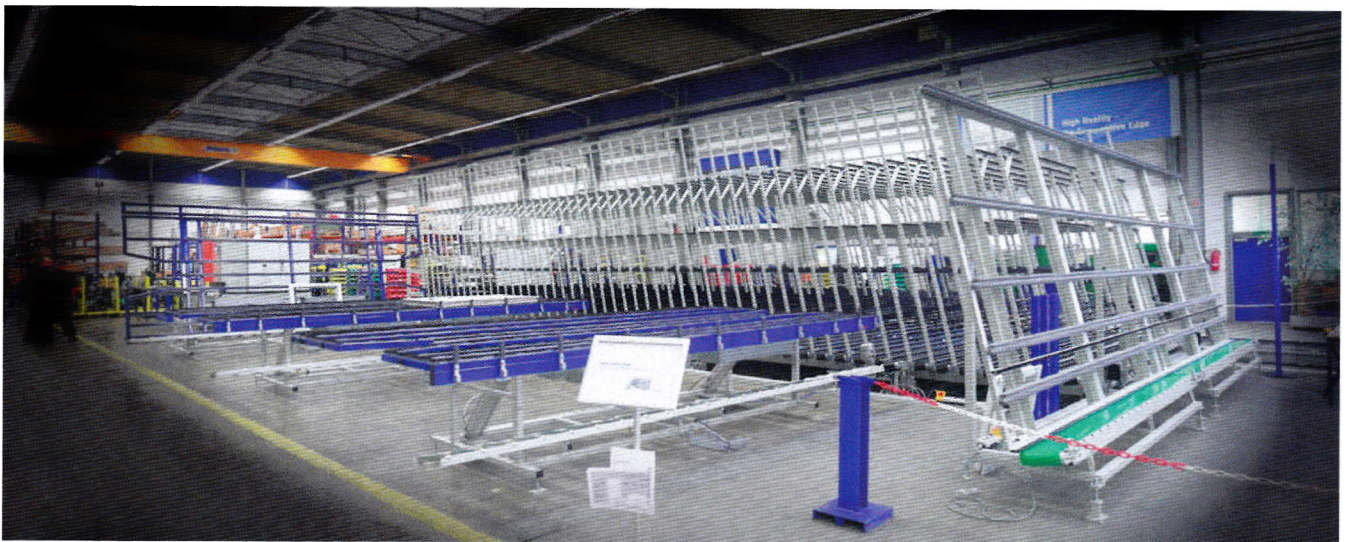

THE ADVANTAGES

Optimum workflow for efficient production

- › The automated assembly and logistics systems from Stürtz give your window production the competitive edge
- › They ensure an optimised workflows and an uninterrupted and efficient production process
- › Each material handling system can be individually adapted to your production processes
- › Ergonomic design, high-quality materials and innovative technologies ensure absolute dependability and the highest process reliability

TECHNICAL DATA

“Project-specific”

Rational material handling

Automated work processes

Continuous production flow
