

ZX5-E

AUTOMATIC SAWING & MACHINING CENTRE

THE ADVANTAGES

- > Fully automatic uPVC window and door fabrication machine
- > Quick and accurate sawing and prepping of full bar lengths into finished pieces, ready for welding and cleaning
- > Automatic loading, prepping, cutting and discharge
- > Producing all saw cuts including arrowheads and all normal preps including trickle vents, espags, drainage, spot preps and 'V' and 'Y'- notches
- > No turning of profile: Notches can be produced on both sides of the profile. 'V' and 'Y'- notches can be produced on both sides of all profiles automatically
- > Rotary tooling mechanism for guaranteed accuracy, speed and flexibility as well as reliability
- > Comes with eight high speed spindles, the powerful 'Tru-Loc' gripper system and 'Y'-drive sawing module, for perfect 'Y'-notches every time
- > 500 - 600 windows per week with one operator
- > Running on Windows 10 software, utilising latest control systems manufactured by Beckhoff

High productivity

Ensures accuracy,
speed and flexibility

Reliability that
carries a guarantee
